## Fortinet Technical Documentation Update - September 1st to September 24th

To help you find new content that our documentation teams create, this email update walks you through our newest documentation and videos. Here's what the documentation teams have been up to:

### What's on the menu for the FortiGate Cookbook?

Keep yourself up to date with the latest new recipes and videos from the FortiGate Cookbook. There is also a new Beta FortiGate Cookbook website which puts the content we know and love into a more dynamic and user friendly HTML format. It's easier than ever to comment on individual recipes using the [Disqus](#) comment section at the bottom of each recipe. Here's the newest recipe debuting on the website: [Using IPsec VPN to provide communication between two offices](#).

- Beta FortiGate Cookbook Home Website: [http://cookbook.fortinet.com:1080/\(New\)](http://cookbook.fortinet.com:1080/(New))

### New Cookbook Recipes

Our new recipes include a new BGP recipe: [Setting up BGP over a dynamic IPsec VPN between two FortiGates](#).

- [Registering your FortiGate and configuring the system settings](#)
- [Setting up an Internet connection through a FortiGate unit using a 3G/4G modem and a FortiExtender](#)
- [Using a static URL filter to block access to a specific website](#)
- [Controlling which applications can access network resources and the Internet](#)

### New Videos

Watch the 5.2 [FortiGate Web UI Tips & Tricks - Part 1](#) video to pick up new GUI tips that will make it easier to configure and modify firewalls.

- [Adding a FortiGate in Transparent mode without changing your existing configuration \(FortiOS 5.2 Video\)](#)
- [Using a virtual WAN link for redundant Internet connections \(FortiOS 5.2.0 Video\)](#)

### New SysAdmin Notes

The most recent addition to the SysAdmin's Notebook is called [Firefox's SSL Public Key Pinning](#), and it explains how to deal with any impact that Mozilla's latest Firefox Version 32 release may have on your Fortinet environment.
